If you're looking for the FIM 2010 RC1 preview, please visit the Microsoft Download Center at Key points: \* You will be able to install and run the FIM demo virtual hard disk on your own Hyper-V server \* This image comes with a pre-installed version of FIM 2010

## Forefront Identity Manager 2010 RC1 Demo Virtual Hard Disk Image

This virtual machine image is designed for evaluation and testing purposes. It has a single virtual hard disk that must be partitioned for installation of FIM. Any attempt to extend or shrink the main virtual hard disk will cause a failure of the virtual machine. Please do not use this VM in a production environment. When a security update is released for Microsoft Forefront Identity Manager, the updates are normally released first to customers in a lab environment. If the lab test turns up issues, the test results are added to the CTP2 branch. There may be issues with the CTP2 branch. Once the CTP is released, the CTP2 branch will not be available for downgrade. Copy the.vhd file to an uncorrupted NTFS volume on your local computer. The VHDx (Virtual Hard Disk) file created by this product is not compatible with other operating systems. It is compatible with: Hyper-V Server 2008 R2 Microsoft Windows Server 2008 R2 x64 Microsoft Windows Vista x64 Microsoft Windows Server 2008 x64 Microsoft Windows 7 x64 Microsoft Windows Server 2012 x64 A: There's no reason why you can't put it on a virtual machine, but it's not a good idea: It's not stable It's not recommended for production It's not clear to me exactly what you'd use it for, but: You could use it to try out the evaluation version of Identity Manager (which is essentially the full version) You could use it to try out the migration wizard Of course I really suggest you try and use the full version of Identity Manager - it's available here. You can try out the migration wizard here and it's also available as a free download here, which you can download here. Friday, January 30, 2009 FUCK THE FUTURE. Wow. Yeah. I did this. It started with the indescribable feelings of just an oh my god, something's wrong I never knew I was a clock. Then I went to the mirror and said "Nah, it's cool, right? It's perfect. I look perfect." But of course I don't. And then I went to the computer and said "Nah, it's cool. I work on computers every day." But I don't. And then I looked over at the trash can and said " b7e8fdf5c8

### **What's New In?**

Forefront® Identity Manager® is an identity and access management application designed to help organizations comply with regulatory mandates, reduce risks and reduce costs of operating their information security programs. Forefront Identity Manager 2010 enables administrators to centrally control and manage the identities and access of users and devices in Windows-based environments, and to integrate identity data in a Windows enterprise network. Forefront Identity Manager integrates with Active Directory and Microsoft Exchange Server 2007 and provides many management tools for auditing, reporting and assuring compliance. Forefront Identity Manager 2010 RC1 - Administrators can store all user data in a single location and securely access, delete, or update information at any time, whether it is on a single workstation, a server, or an Exchange Server in a large enterprise. Administrators can control whether any user is granted access to specific data, even if they are anonymous or not authenticated. Forefront Identity Manager integrates with Microsoft Exchange Server 2007, MS SQL Server, and MS Office 2007 (Word, Excel, PowerPoint and SharePoint). Users interact with Forefront Identity Manager via the Outlook client. A feature added with the release of Forefront Identity Manager 2010 is compliance logging and configurable reports. Compliance with regulations can be measured against a predefined set of requirements. Administrators can create and generate reports of audits, compliance monitoring, access to sensitive data or incidents. Forefront Identity Manager works with many third party solutions, such as Microsoft Forefront Threat Management Gateway, Microsoft Forefront Threat Management Gateway Server, Authentication Services, External Authentication Provider, Active Directory Federation Services (ADFS), SAML, Kerberos, SecureID, PX Web Services and Active Directory. Forefront Identity Manager shares identity and access management information with partner products, and offers integration with other products. Forefront Identity Manager is provided as a virtual machine image. The virtual machine has Hyper-V capabilities and can be installed in Windows Server 2008 or Windows Server 2008 R2; or in Windows Vista, Windows XP SP2 or Windows 7. Forefront Identity Manager 2010 RC1 Microsoft Exchange Server 2007 SP1 or later Microsoft Windows Server 2003 SP1 or later Microsoft SQL Server 2008 SP1 or later Microsoft Forefront Threat Management Gateway 1.0 or later, Forefront Threat Management Gateway Server 1.0 or later, Authentication Services 1.0 or later References See also Forefront External links Forefront Identity Manager 2010 Identity Manager
