Bhaskar. Discrete mathematics..Q: How to  
set a default image on react-share? I am  
using react-share to display a share button

---

on my app. I want to have a default thumbnail that will display when the user doesn't have a photo, and if one is available, it will show up and then the user must choose a new one. The problem is the `if(image===null) {image == ""}` line throws an error: Invariant Violation: Project name is not a DOM element. It seems like it is saying "image" is undefined. How can I set a default image and hide it?

```
import React from 'react';
import {Share} from 'react-share'
export default class ShareButton extends
React.Component { render() { return ( ); } }
```

A: This issue is fixed in a recent version of react-share. You can see the fix in this PR: [A: This issue was reported to the react-share authors and I am going to work on](#)
