An approach for the rapid detection and analysis of gene expression in developing brain has been developed that is based on in situ hybridization. This technique is now being applied to the study of the localization of the immediate early gene, c-fos, in hippocampal formation of the rat following kainic acid-induced seizures. Preliminary studies have shown that the distribution of this gene is altered following seizures. Since c-fos

mRNA is detectable soon after seizures begin, studies on the cellular localization of this gene could reflect, in part, changes in the expression of other genes. A detailed analysis of the distribution of this gene during postnatal development could elucidate the role this gene may play in learning and memory. The in situ hybridization method is being applied in conjunction with the light microscopic autoradiographic technique for the first time in this region. These experiments will include the morphological identification of cell types expressing the immediate early gene. The autoradiographic technique allows the visualization of mRNA expression at the light microscopic level. This approach may be useful in studying the cellular basis of learning and memory and may provide new information regarding this complex behavior. ===== The icons on this page are inspired by a fictional television show that most of us probably have never seen. All the icons are available in a.ico and a.png format, so you can use them with Windows applications or replace them completely in any graphics program. My goal was to offer a collection of icons that was both representative of the show but not too over the top. The goal was to create a symbolic icon that would fit into a desktop metaphor, similar to the icons in OS X. What sets this iconset apart is that the focus is on great design and ICON STANDARDS. So you can easily find a version of this iconset that will work in most iconsets. These icons are included in a simple zip package that you can download and easily extract, that also includes desktop-ready icons for using in place of the scandal icons. If you have any problems while using these Icons, just write a comment and I will help you with a simple solution. \$6.00 N/A Scandal Icons Pack Add-ons 100 icons in a simple.ZIP format that you can drag into any icon set. \$15.00 Scandal Icons Pack Add-ons I will only be releasing the first set of icons for this iconset.
