AltMove Mouse Manager

AltMove Mouse Manager is a port of AltMove 1.1. It is a simple to use and very flexible utility that helps you perform various operations related to windows (e.g. move, resize, hide) using your mouse clicks and hotkeys. Through this tool, you can copy items to the clipboard, take screenshots, capture the desktop, and more. Description: Use Advanced Command Terminal to access the following features without typing any commands: - Open a DOS Prompt with multiple profiles - Execute multiple DOS commands in parallel - Be notified about errors and success cases while typing commands - Execute external programs from the command line - Run Windows and DOS programs in the background and hide their windows - Make multiple shortcuts to folders and files Description: The WvW Hax is a small program that checks the system files to see if you are vulnerable to the CVE-2015-2459 exploit. If you are vulnerable, the WvW Hax will attempt to fix the problem for you by either running WvW's auto-update utility or downloading and installing WvW's patch (see the included readme for more information) from the GitHub repository. In the event that WvW's auto-update utility fails (e.g. you need to download a patch yourself), the WvW Hax will immediately revert your system back to the original configuration. WvW Hax is compatible with all versions of Windows from Windows Vista through Windows 10. It is free to use and no consent is required to use it. You may download it here The source code to WvW Hax is available here: Description: The LSWPCleaner tool will scan, fix and clean the files of your Windows Operating System (including Windows 7/8/8.1 and Windows 10) and various third-party applications. Perform system wide scan, user level scan, scan a particular folder or file, as well as a simple check of your Windows hard drive. LSWPCleaner includes many fixes and optimizations, such as fixing one of the most common WU service problems, fixing and optimizing your IE browser cache. After using it, you can ensure your machine runs faster, has less stability issues and is much more responsive. Source:
